

M.A.D.E.™ In The USA

“Made in the USA” is a popular patriotic slogan that encourages consumer purchase of products and services from American manufacturers, producers and service providers. Our “**M.A.D.E.™ in the USA**” system is about helping you to become that manufacturer, producer or service provider so you can easily create a self-reliant income, proactively participate in wealth creation, and achieve the American Dream.

The **M.A.D.E.™** method comprises four essential Industry areas (**M**arketing, **A**dvertising, **D**esign and **E**-commerce), which combine to guarantee your business success in today’s technology-driven marketplace. Any product or service begins this pipeline-style process as a passive idea then quickly and affordably channels through to become an active self-sustaining, money-making business.

With 21 years of experience in advertising, marketing and talent industries, Larry Freeman personally models his message having used this same system to transform his ideas into several, successful private business endeavors.

“M.A.D.E. in the USA”: In this lecture, Larry Freeman will discuss how to effectively channel your product or service from a passive idea into an active, self-sustaining, money-making business quickly and affordably in today’s technology-driven marketplace through a pipeline-style process of essential Industry areas: Marketing, Advertising, Design and E-commerce.
